The business of this institution is conducted upon scientific principles, as based upon tables carefully prepared by competent medical and mathematical calculators; and the rates of premium are as low as those of any responsible fustitutions in this country or in England; and as low, undoubtedly, as is compatible with the safety of the insured and the stability of the Institution.

Every one will readily perceive the very great advantages to be derived by availing themselves of the pretection offered by this Institution, which has been established from benevolent ard philanthropic motives, under the influence and deep sense of the distress and humility to which many are reduced for want of an established principle, sanctioned by public opinion, and conducted under an organized responsibility, where all who are disposed to anticipate the decrees of Providence may, in times of health and prosperity, purchase with the results of their industry, the right to protection in sickness and adversity.

Dr. Roback was consulted about two months since by a farmer, about to sell his farm, with the intention of going to California. The interview resulted greatly to the advantage of the farmer, as all his friends and acquaintances (save one) will energially testify.
